## DETAILED ACTION

### *Double Patenting*

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claim 28-59 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-93 of U.S. Patent No. 6,606,749. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims require a protective garment to have an inner lining assembly configured to cover a predetermined portion of a wearer's body, an outer shell covering the inner lining wherein the outershell is a woven fabric made from a fire resistant material and having a basis weight of at least 5.5 (6.0) ounces per square yard and a durable water resistant composition incorporated into the woven fabric such that the outer shell has a water absorption rating of less than about 8% after being laundered five laundry cycles.
